Colorful Garb Marks Florida Indians

Seminoles Misrepresented By Sensational Writers

By BAUKHAGE News Analyst and Commentator.

Are Real Art

The skirts are made of parallel

bands of a brightly colored patch-

work design which experts claim

are real art. They are fashloned of

hundreds of separate pieces of col-

orful cloth, blended or, contrasted to make a barbarically splendorous

whole. The skirts bell out, widen-

ing in circumference as they ap-

proach the hem which, according

to regulations, must trail at least

three inches or thereabouts on the

How can this be a practical every-

day dress in a country of swamps and morasses, of barbed and cut-

ting underbrush? That is the first

question I (and every ignorant ob-

server) asks. But they are practi-

cal, say the experts who have seen

them in operation. Through wet go-

ing and wading, they are "histed"

(there are no undergarments to com-

plicate matters). Traveling over

the dry and dusty fields, rife with

snakes and other annoying rep-

illes, they protect the bare feet and

shins. As Miss or Mrs. Seminolo

moves forward, tooing in slightly,

according to good Indian custom,

she gently kicks the dragging rim

forward without baring the bare

feet to inquinitive eyes or any flora

The only other cloth garment is

examine the contradictory data on the Seminoles Baukhage and sinke killing: When I called on Agent Bochmer, his wife re-

counted how a greatly-excited Indian had appeared one day on their doorstep to announce his pressing desire that Boehmer come to the Seminole camp-a 100 rods or so distant-to kill a rattler.

Bochmer obliged. He carefully avoided carrying the corpse through the camp (a Seminole taboo), and he noted the usual fire lighted at the point where the victim fell. As usual, the Indian children had cooperated with him, without actively participating in the execution.

There are two explanations as to why the Seminoles would not themselves kill the snake. One is that once in the past the Seminoles were ordered by the White Man to leave Florida for points west. They prepared to remain even though it meant reliring deep into the Everglades. However they decided it would be a good idea for both parties if they made a treaty with the snakes. They did so on a "live and let live" basis. That is one ex-

Or it may have been one of those common sense arrangements embellished with the authority of mysticism. There are few anakes which, if left alone, won't reciprocate, .

Another interpretation may be that when a white man attacks the rattler, the chances are that if anyone is bliten, it would not be an Indian, I understand Seminoles do kill snakes when it seems necentary.

Bochmer, whose opinion I learned to value as I pursued this subject, thinks the rattlesnake situation is interesting, but I couldn't get him to say it meant the Seminole was

Gaudy Costumes Intrigue Observer

Like every observer, I was impressed by the Seminole attire, Not

by the men's-they wear conventional garments lightened by a gay handkerchief about the neck when they pursue their dally tasks, hunt on the reservation or loaf in camp, They have shortened the long skirtlike garment (comparable to the woman's cape) to sport-shirt length, even in ceremonial dress. I found only Sam Huff, reputed

to be a medicine mon as well as the handy man at the school, wearing the long skirt-like garment, plus the blouse Some say Sam clings to this outfit merely because of his love for the past, others say it may have something to do with his special function as a medicine man; there is a whisper that it is a badge of repentance or punishment for some past sin Sam is a grand. father today. He still lives in the nearby camp with the rest of his three generations,

The younger men save their gay shirts for dress up occasions (the stinual green corn dance and the hunting dancel, but they have adopted modern trousers. Their shirts are coverd with complicated Keometric tracery; their scarves are bound by a metal or wooden clasp; they wear beads or other Marriages and Births Hit Peak

brightly decorated fobs. The most striking piece of Semincle clothing is the woman's billowing skirt; next come the beads which cover her neck from shoulder blade to ear tips; then her hair-

Valike the men, the Seminole women (except those who have been completely converted to modern ways) wear their special garb and States can support large population wear It all the time. Consequently, they always look "dressed up."

The hairdress, an innovation and a bighly practical one, dates back only stone six or seven years. The woman's smooth black half is greater than in 1913, previous recbrought forward over a semi-circular cardboard form like the wide Deak of a cap. This gives her the appearance of peering at you from underneath a wide, circular hat brim, and is achieved easily witheut the and of the beauty shop and Virtually without mirrors. Furthers more, the colline is one development that has no tocatettan with pleted" American family was about the White Man's culture 25 children. It is estimated that I this is what is happening:

POLIO POSTER BABY . . . Once a victim of the dread polio disease, Nancy Drury, 4-year-old daughter of Mr. and Mrs. Frank Drury of Louisville, Ky., was chosen to symbolize the fight against infantile paralysis in the 1947 March of Dimes. Nancy, shown relaxing in a warm bath at her home, made a splendid recovery after being stricken with pollo in July, 1944,

NEWS REVIEW

Marshall Gets Key Post; Labor Reforms Studied

STATE DEPARTMENT:

Happy Day "There are two happy days a man has in public life," former Secretary Byrnes told British Ambassador Kerr. "There is the day a man is elected to office. Then there

is the day he guits." January 7, 1947, therefore was a happy day for the dapper little South

Carolinian when he stepped down from his high post in the Truman adminis. tration. It was a happy day, too under the Byrnes' standard-for General of the Army Marshall who was

implied. Marshall's cheer was destined to be short-lived as he took over direction of the nation's international affairs. Byrnes had a tough time tussling with the Russians over completion of peace treatles for the nxis satellites and Marshall faced the even tougher job of framing pacts for Germany and Austria, Although friendly with Russian

leaders, Marshall is no admirer of Communism or Communist tactics. Just before being named to omce, he blasted Chinese welfare of their country to obtain power and resorting to untruths to tar the U. S.

Some observers also read in Marshall's appointment an effort by President Truman to build the general up as his successor in 1948, Should Marshall make a name for himself in the state department, his work there plus his prestige as the No. 1 military chief in World War II would give the Democrats a strong candidate to offset dissatisfaction with the Truman tegime in the reconversion period.

CONGRESS:

Sharpen Payroll Axe Economy + minded GOP house members, axe in hand, were eying the big federal payroll in their announced drive to scale U. S. ex-

penditures 12 billion dollars below the 1946 budget of 41 billion dollars. Declaring that there is hardly a government department that does not have twice as many employees as needed, Representative Taber (Rep., N. Y.), chairman of the house appropriations committee, asseried that 1,000,000 workers could be chopped off the payroll of 2,300,.

Labor Reforms

Sen. Joe Ball (Rep., Minn.) and Rep. George Case (Rep., S. D.) pushed labor reform in early sessions of the 80th congress, Ball proposing sweeping measures for from." corrective legislation.

of secondary boycotts and making labor organizations liable for violating contracts.

Then, he introduced legislation to ban all union and closed shop agreements and maintenance of membership contracts.

Finally, Ball proposed to decentralize collective bargaining to prevent the tleup of an entire industry

inrough general negotiations, The new Case bill introduced in the house permits issuance of injunctions to prevent strikes impairing the public welfare; forbids unlons to coerce employees, seize property in disputes, withdraw essential maintenance workers, or order walkouts with majority approval of members; and makes union liable for damages resulting from breach of contract. The bill also grants the

states authority to ban the closed

ECONOMICS:

Reds for risking the President Reports

In the first annual economic rethe employment act of 1946, Mr. Truman set forth the principles for prosperous America. Drawn by a three man council of economic advisers, the report called for continuance of the traditional free enterprise system supplemented by constructive government assistance

where necessary. Long-range recommendations Include maximum use of labor and productive facilities, prevention of economic fluctuations, cooperation. in International trade and finance, and promotion of welfare, health and securliy.

Because of their immediate bearing, the short-range recommendations were of greater interest. The report asked for the maintenance of present lax rates to provide for substantial retirement of the national debt; lowering of prices wherever posalbie to increase consumption; moderation of labor demands to head off additional price rises; increase in the minimum wage above 40 cents an hour, and extension of the fair labor slandards act to workers now excluded.

"The statistics show that, first, the

depression postponed about 800,000

marriages for a time; second, the

IN FULL PRODUCTION

FOR QUIZ PROGRAMS

"How now?" we asked the Man Who Built a Better Mousetrap. 'What's the situation?"

"Everything's going good," he replied, "We're in full production." "Stuff getting through to the American homes at last, eh?" we

"Oh, no," sald the Man Who Built a Better Mousetrap, "Nothing's getting through to the American home. Nothing at all." "Where is the stuff going?" we

sked. "Radio programs," said the M. W. B. A. B. M. "We're just like most industries, we don't expect to get much through to the customers for a couple of years. The radio programs take everything we can turn out."

"Don't tell me that mousetraps, too, are among the prizes on radio programs.

'Why not? The radio people don't tell the winners they're mousetraps necessarily. They say they're a new ash tray imported from France, or a novelty air purifier or an electric lighter or Swiss book ends. Of course, if a master of ceremonies on a radio program sees a contestant who doesn't look very bright he may admit it's just a mousetrap but tells the radio audience it can be applied to a stiff shoulder as a poultice."

"The quiz program has been a great thing for industry," we suggested. "In the old days a slump could not be cushloned by merely getting a lot of people into a studio and seeing it they knew the name of the bridge Steve Brodle jumped

"It must have been tough," First, Ball called for prohibition sighed the Mousetrap Builder. "Fancy being in the manufacturing business and not be able to supply prizes for the Queen For a Day program!"

> "One thing is not clear," we said, "Isn't there a terrific public demand for most everything manufacturers produce today?" "Oh yes."

Then, why do the manufacturers deluge quiz programs with millions of dollars worth of products

hourly?" The Man Who Built a Better Mouseirap regarded us sternly. "So

you'd get stuff to the consumer and not to all those people who turn up on radio programs and tell what Washington's first name was!" he said, abruptly leaving us.

Presidential Campaign And Television

More bad, news!

The candidates and orators in the port lasued by the President under 1948 presidential campaign are coming to us by television!

The long-suffering public is going to get not only alarming speeches but alarming faces!

Just as election campaigns were first broadcast in the Hoover era, the first big-time television performance will be put on during the next Presidential campaign.

Condidates should be heard but not screened. Only one in a million has a face that an interior decorator would call essential. Under simple radio, there was always the comforting thought a candidate might not look as bad as he sounded. Under television he can be gullty on both counts.

We predict right now that television will cancel out the women's vote. It took 150 years for them to get the ballot. Under television they may give it back.

The only candidate with a chance may be the fellow who makes the women voters remark not "Sound, isn't he?" but "ah-h-h! What a hunk of mani"

"The situation in the Democratic The siluation in the Democratic party is not hopeless if new blood is infuted."—Jim Parley. This is the first time anybody has classified its plight to desperate as to call for transfusion. "Seventy Per Cent of Lend-

Lease Repaid," says President .-Headling. "I didn't realize," says Ima Dodo,

"that we could afford to advance the money to pay us back,"

New low in movie illes: "The Corpse Came G. O. D."

Julia McFarlane's husband, Richard, disappeared in World War I, leaving her with two children. She and her father in law, John I. McFarlane, have tried in vain to find some trace of Richard. Twenty-five years later, Ric 4s 27 and serving in the army of World War II, while Jill, 26, professes an interest in Spang Gordon, a young lieu-tenant. Julia is worried about Ric, who has "washed out" in the air corps, and about Jill, who she is afraid might become an army wife, subject to the same grief she has endured. She confides these worries to Dave Patterson, a family friend who loves Julia but has never told her due to her loyalty to Richard. Spang and Jill go to a dance.

CHAPTER III

Julia's lips quivered; the color came into her face and then receded, leaving it aged a little and filled with patience.

"He was the children's father, Dave. Jill's father. He's more hers than ever now that it's war again. She wears his memory like a decoration. I can't destroy him for Jill. She admires me now. I want her to keep on admiring me. That's selfish, I suppose. But for people with forthright minds like Jill's, the world is pretty well filled with people who have to be despised. And of course there's Ric. He worries me. John I. says I've spoiled him, but right now I'm afraid to take anything away from Ric, anything that strengthens him, even a little,"

"But they know that their father is dead. That's why he's heroic to them, because he's a splendid idea that never had any substance. If he had come back-well, I won't talk about that, Dooley. But you know that we all grew up together -I know the kind of life you had with Richard-"

"Yes, I know. There are things I can't forget, too, Dave. Unpleasant things. John I, has been at me for years to have Richard declared legally dead. But somehow the idea is horrible to me, like opening a

"I can't talk to you about it, of course, Dooley. Not that-or anything else that's in my mind-so long as you are Richard McFarlane's wife," Dave said quietly, leaning forward, his long slender hands dangling between his knees. But I can't agree with you. Your attitude doesn't make sense."

"I know, But most of the really important things in life don't make Bense."

Dave walked the length of the room, his hands thrust into his pockets. "The dead are dead, Dooley. The decent thing is to bury them and keep your memories. Tell me one thing. Is there any love left in your heart for Richard Me-Farlane?"

She put her hands to her throat with a young, wistful gesture. "That's unfair of you, Dave. That's a question I haven't dared to ask myself, all these years. I did love him terribly once, and then, after time went on, when there was no word, no record, nothing at all, something bitter that I've fought, with all my soul and all my strength, began to grow in me. I battle it at night, and it's like fighting a shadow, but a shadow with a steely, strangling grip, something you can't touch or see or feel, but can't defeat,"

"Dooley, you were a child and you fell in love with a boy. All this morbid stuff-a psychiatrist could explain it; I can't, If you were to meet Richard now, suddenly-impossible, of course, just a figure of speech-but if he were to come back jato your life you might be sick with disillusion. You'd discover that you had grown, you'd know that young love of yours was merely one of those wild and pretty fires that flame up before the age of reason and then die."

The Girls They

Leave Behind

"To ashes? That's what you were going to say, isn't it? And cometimes the ashes are very dark and very bitter. Actually, I'm not cherishing ashes though, Dave. I don't know just what it is I'm keeping, exactly-an ember, maybe, that refuses to burn out. Of course, If Richard were to come back now I'd probably realize that I've been harboring something unworthy. It would change everything. Don't despise me for being a fool, please. And don't desert me."

He put his hand on her head and roughed her heir gently. "I won't desert you, Dooley. But it doesn't make me happy, seeing you beat your head against a stone wall forever. I'd better go now, I rode over, and it's five miles back."

She said, "Good-by, Dave, John I, will be sorry to have missed you. He likes you a lot." And she pressed his hand.

Days went out, his head thrust an nurs of moonlight. forward a little, as men walk who love the land best though they may not serve it. He closed the screen door without a sound. The horse ter of the regiment. Something nickered softly as Dave opened the about you—the way you stood so into the saddle.

the horse anorted at their scurrying the army."

escape. But Dave leaned forward

In the saddle, and als heart felt be—she had seen him only twice,

There was so much that he remembered, Julia McFarlane, a dancing, copper-headed scrap of fire -Julia, seventeen years old and as full of laughter as the little streams that tumbled down the hills recklessly into the river. He had been in love with her then. But Richard McFarlane had had a redwheeled buggy, and the glamour of sophistication had invested him. He had had some kind of unimportant job in Washington then, but Dave had known that he was a swashbuckler and a gambler and a liar,

Dave Patterson tensed his hands on the reins, so that his horse raised his head and snorted.

Jill McFarlane, christened Julia, was dizzily, ecstatically happy. The station-wagon was full of rattles and lumbered along at a discreet thirty miles an hour. Jill nursed a brief hope that her dress wouldn't be ruined by grease or something before she had a chance to dance in it; but this small shadow upon the beauty of the night she

put out of her mind, because she

She had seen him only twice.

was with Spang, and his eyes approved her, and life was just now very wonderful. She had met the reality of war

with a sinking sense of panic, All the girls of her own age that she knew had been caught up in a sort of whirlwind of despair. "We haven't a prayer!" they mourned, "They'll all go off to

fight, and then when they come back we'll be old malds, and they'll marry girls years younger, kids that are in high school now. It was that way in the last war; my mother said so."

Some of them had already pulled out of the dreary eddy and gone off on mad tangents, marrying men overnight, marrying men they knew little about, men who were changed by the glamour of uniforms, anything to be saved from being sucked down into the dismal doom of spinsterhood. But something fastidious. something that held aloof, in Jill had made her scornful of these fevered and uncertain escapes.

She told herself that she was a mature woman. She was not a silly young thing to be swept away on a tide of adolescent emotion. Her mother had not been eighteen years old. An infant, practically! She thought of the eighteen-year-old girls that she knew and how frightfully young and naive they were, and was swiftly sorry for them and for that young and deluded creature who had been her mother.

Jill Talks About Herself

"I liked your mother," Spang sald abruptly, as though he had caught the trend of her thoughts. "She's a grand person. And she looks young enough to be your sister."

"Dooley's forty-four." Jill was not quite sure that she enjoyed the idea of being Dooley's alster. "She and my father were married when they were children practically-just before the last war. Then he went to France before I was born . . . She stopped abruptly, knowing that sooner or later Spang might be going overseas, too. She could not say, "He never came back." Not with Spang so near, not with the lovely present lying about them like

"So you were born to the military tradition? The first time I saw you I thought you looked like a daughgate, closed it behind him, and alld straight with your eyes shining Into the saddle.

He trotted slowly up the lane, you stood on tiptoe when the band rousing all the little pigs again, and played, I knew that you belonged to

heavy and dark and sour in his it couldn't be, but oh, how wonderful if it were true that Spang liked her, tool Dooley had tried to put caution into her head.

"There's a lot of emotion seething in the air in wartime, Jill. Some of it is wonderful and fine, and some of it is a passing fever, a sort of recklessness that leads men to say things they don't really mean and women to believe them. So keep your head, no matter how your heart goes,'

"I was raised in the military tradition," she told Spang. "My brother and I were utterly different, but even in those stodgy years when everybody was pacifist and soldiers were tramps in khaki who weren't admitted to theaters or good hotels, Ric and I always marched to military music. It was because our father was a kind of special glory that we had, and we hated anything that detracted from his splendor. It's a wonderful thing for a child to have something like that to live up to.'

"Was he decorated or something?" Spang asked, steering the slow vehicle around a halted bus. The bus was full of soldiers hanging heads and shoulders out of the windows, and some of them grinned and some of them saluted, laughingly, and Spang snapped a salute in "Some of our boys," he told Jill. "On their way. Destinaion unknown."

"No," Jill took up the conversation again, wishing they hadn't glimpsed those traveling trops, wishing Spang would not look back at them. "No, I don't know that he was decorated. My grandfather investigated when the war was over, when we aldn't hear anything from my father-but he couldn't find anything at all. But they were all ieroes, weren't they?"

was thinking to himself, a trifle bit-"And so are you-and all those

boys back there! War is a hero's business."

murred, "a dirty job that takes men mers and many weekenus we took to do it. So we go and do it. We don't like it and we growl and gripe, and the enlisted men cuss the of- and hospitality. That hospitality! It ficers and the officers cuss the poll- doubled my bills, of course, but It ticians, but we wouldn't miss it, not meant that the children could reit's ended and we can go home." "Let's not talk about the war, Though-" Jill shivered a little,

"there doesn't seem to be very much else to talk about." "Let's talk about you," Spang suggested. "I know you're Ric Mc-Farlane's sister, but that's all I do know about you, except that you're red-headed and like military bands and dancing."

"That's all there is, really. I or join the WAC or something, any. another block our path. thing with brass buttons attacted But my grandfather sat on 'at Idea. You mat h m-old John I. He's a unique characters my mother, though he and my fa-

ther didn't appreciate each other exactly, I understand, one of those family things. He lectured me like a top sergeant and said that Mother had had a tough life, and now she needed me around to keep things merry and bright because, of course, Ric would go into the service, so there I am-just a home girl. the place I'll end up beeing corn ; are over for the present and feeding pigs and things."

mine up because I felt it was the right on."

"Plenty of cars around here." keen band, but probably half-way through the dance the leader will dash off and enlist in the cost guard."

They parked at the end of a line and walked across the mown grass, and Jill held up her trock and hoped the dew wouldn't ruin her aligners. Probably the dress was sagging again, but that wasn't important now. It seemed a little odd that it had ever been important. The important thing now was this brief, shining hour she held in her hands. Over its glittering rim into the future where ashes of empty days might lie, she would not look. She was going to be happy! She was in love, and no doubt it showed on her, though she tried to keep her gay nonchalance,

MEETING THE TEST

It is very bard and painful for a prosperous, upper middle-class family to drop in the scale to what seems a poverty level. It happened often in the early years of the depression, in the 1930s, but not many people have had to face this crisis during the war years. The Porter family of Minneapolis, however, had to readjust their living standard radically when John Porter fell chronically ill and had to give up his job as a salesman.

Mrs. Porter bad to make swift, stern decisions. The children had to give up all the glamorous social life, all the expensive frills that had come to be all-important to them. Jack quit college and went to work in bis father's firm. Mrs. Porter found a job in a botel, Amanda left school and took over the housework. They bought a place in the country; a worn-out farm that provides a pleasant home, with plenty of fruit and vegetables.

insurance and the children bring in more than the little we need here. Went Through the Fire." "We went through a terrible time,

when we had to endure our chil-"One car wasn't enough, Jack dren's bitter disappointment and said. One sitting room wasn't suffering, when we had to act in a enough for Amanda. I talked of a way that seemed to them nothing job, but couldn't be spared at home, short of cruel. I had to make dewent off to school, and I wasn't Amanda talked of Hollywood, but as cisions that even to John scemed terribly bright, though I finally that a minor couldn't try that. It was too sweeping Sweeping! That's the grab an A.B. And then I care an impasse, with John and me rolls word I had to sweep prole aside, home crazy to drive an ambula co Ing away one stone, only to have sweep away pretense and show. I had to let our friends know that we were rained, that we could Then, when meat and butter not do for our children what luckier

> a walty to their father "The private schools, except perhaps to weaken and spoil "I took a Job in a holel, making | them. But to face the ultimate

I agree entirely with Mrs. John Porter We don't have to manufactare difficulties and sacrifices for our children, but if honor demands "You turn here," Jill said, "and We were more than three thousand them, surely we are aronging those that building on the hill with all the dollars in debt, and I should, her children by refusing them their share of the great battle that is life it; it's a funny little place but the Her comment was made gravely, I bulay. And by honor I mean the paying of bills, the faring of restoin. adulties, the adjustment of family learding on that one person does not carry the whole had

Perhaps Mrs Perter is pessimistic in prophesying that hard times are ahead for many of us But a good many wise voices are reminding us that these are good travagance or that demand, but by a rational and serious discussion of present assets and future liabilities If it proves unneccessary, at least it will do no harm. And if yours is a family still insecure as to its anancial, social and provisional outlook, it may do great good.

Sfore Vanilla in Prospect

Vanilla bean crop in Madagasear, which produces about two-thirds of world erop, is forecast at 1,100,000 pounds or 10 per cent larger than last year's outturn of 992,000 paunds. according to reports.

In line with French policy in recent years colonial ministry in Paris has proposed that quota of 1,322,276 pounds of vanilla beans be estab. lished for U S. to cover period October 1, 1916, to December 31, 1947, with at least one-third of the

PEOPLE WANT ABOLISHMENT OF USELESS PEDERAL JOBS

IT WAS AN ACCIDENTAL gathering of a small group, all fellow townsmen. The conversation, as usual, turned to politics, the state of the nation and what could be expected from Republican control of the legislative branch of the govcrument.

"What congress should do first is cut government expenses," sold a merchant, "Fire a million or more bureaucrais, and give us a chance to get going ngain."

"Right you are, up to a point," said a local politician. "We should turn the bureaucrats out, but not abolish the Jobs. We will need those Jobs as rewards for party workers if we are to build and maintain an effective political organization. We council expeet party workers to give their time and effort without some sort of compensation, and that means Jobs for those who want John or for their relatives and friends, With more than 200,000 federal John in this state ulted by Republicans, we could re-ward practically all the party workers, and have a party organization that would insure our confinued surcess. Yes, inra the bureaucrats out, but do not aboutsh the Jobs. Fill them with men and women who have demonstrated their party loyally."

It is of such idear that political tractation, either Republican or Denogratic, are made. The upropr on He part of that qual group of local techspeople at its hald statemeet at a heal politicism was cylthere that even wethers are not appared by the pullerty of Amerto a curious They were, aside from the particular, is count for absolutions every predicts job as well as flring the barraugrats. There was no septenent for treples the jobs on a toxell for party neglected

Daytime Dress

NARROW harmonizing bind-A ing makes a nice finish on this simple styled daytime dress in the larger size range. The flattering panelled skirt is beloved by all women and goes together easily and quickly. You'll wear it everywhere with pride now through Spring.

India's Lack of Medicine

Lack of medicine as well as lack of food has long been responsible for the unparalleled death rate of India, where, even today, there is only one pharmacist for every 5,000,000 persons, compared with 2,965 for every 5,000,000 persons in the United States.

Norway Honored Weave Of Museum Pieces by L

Few artists have been honor during their lifetime as was N way's celebrated weaver, F Hønsen (1853-1927), After her estries had won awards at a international expositions and come museum pieces, the 1 wegian government, fearing her work might be purchas abroad, passed a law forbidd export of any more.

Two Firestone CHAMPIONS

ANY OTHER TRACTOR TIRE

ROYAL JUPITER, Grand Champion steer at the 1946 International Livestock Exposition, best shows today's demand in beef cattle, And on American farms, the New Firestone Champion Ground Grip is the Champion among tractor tires.

As the Champion, this now tractor tire cloans up to 100% more effectively . . . pulls up to 62% more at the drawbar . . . lasts up to 91% longer . . . and rides smoother on the highway.

There are sound reasons for this. The curved traction bars flare outward from the center, making a wider opening at the shoulder from which mud and trash fall easily. The connected bars take a powerful "center bite" in the heart of the traction "center bite" in the heart of the traction zone. The extra-deep, pyramid-like curved traction bars cut sharply into the ground with a cleaving action. The extra height, plus buttressing at the base and Triple-Bracing near the center, give the bars greater strength and stability. Continuous bars give the Champion smoother contact with the highway. Language. contact with the highway . . , lengther.

When you order tractor fires, or a trac-tor, ask your Implement Dealer, Firestone Dealer Store, or Pitestone Dealer to specify Firestone Champion Ground Grips.

# Early Efforts Backfired but Lessons Brought Lasting Fame

Two highlights in Thomas A. Edi-

WNU Features.

During his lifetime Thomas A. Edison found time to root around in about everybody's backyard, doping out a gadget or a machine or a formula that would help his neighbor. He was crammed with ideas about many things, some of which, as everybody knows, brought him enduring fame. There were some, however, that his 84 years did not give him time to perfect.

As the 100th anniversary of his birth, on February 11, 1847, approaches, there are probably very few people who know that Edison once won a patent on a "flying machine," Back in 1910, he doped out an idea on a helicopter, in which field he thought the future of aviation lay. On another occasion he was granted a patent on a method of preserving fruit, and when he died he was working on a formula for extraction of rubber from the lowly goldenrod.

Wizard Was Human, Edison once even worked on an insecticide, and this experience shows a human side that belies any suggestion that he had a "magic thumb" in the inventive business, He was just coming into fame as the "Wizard of Menlo Park" when he was approached by a neighboring farmer whose principal crop was threatened with destruction by an invasion of polato bugs. The year was 1678. Tom was 31, and he already had to his credit such inventions as the phonegraph and a score of telegraph patents. The former allowed as how an up-andcoming young inventor ought to be able to find a way to kill off the potato buga.

Accepting the challenge, although he knew relatively nothing about burs and plants. Editon collected a quart bottle full of 1, tato Luig and set forth to componed a tethal perhan Testing every chamical in his deprutary, he hat upon blodblide of earbon us a sure-fire petate bug er sprinkled the infested potato and wanted to tabulate the resul's

The bugs died like flies-but so did the polato vines; and Edison had to pay the farmer \$300 daminges for, as he put II, "not experimenting properly."

He never again made the mistake of not experimenting enough, Consequently, some of his inventions took him years to perfect, and because of his patience the world has become a much better place in which to live. His invention of the electric light made necessary a sysscores of electrical gadgets to the farm home as well as city residence. His phonograph put the best music into the home, and his numerous other inventions, including the motion picture, made life easier, more comfortable and entertaining

Worked Too Well. There was one other of Edison's creations which backfired, but if wasn't because he bada't perfected R; this coe, on the contrary, was working so night telegraph of Prater in the Grand Truck radioad led was that Edison, then 17, most the 2,500 notetooks he filled with cheek in on the wire every half celentifie data and reports before four by sending the signal 6 in his death at 64 on the ber 18, 1231 Morse rode to the train dispatcher at a nearby station.

Edison deplered this arrangement become it prevented from from eatehing up on the sleep he wasn't getting during the dayline, which he spent in study and experimentation. So he rigged up a device for automatically sonding out the signal a He hooked up the instrument to the office clock so that overy 30 minutes the signal went out over the wire, thus reasturing the dispatcher that Edwar was on the fob whereas, in fact, he was sound usleen

This tuse was successful until one night the train dispatcher tried values to contact Edlson on the wire during one of his extnaps, Alarmed by the prespect that the Stratford Junetion telegraph office was onmanned, the dispatcher made his way to Edison's office on a handear. He arrived just in time to find Edison blissfully sleeping while the young inventor's machine obediently dotted-and-

dashed the prescribed signal, The next day Edison started tooking for another job, but the experiment proved of incafculable

Hypnotism Aids in Tooth Extraction
